

BUSS BUSS15

See current catalogue for further detail

IP66 Heavy Duty Suspension Sockets

- Buffalo suspension sockets provide versatility and functionality, to position power overhead in convenient places above benches or work areas where other fixed sockets cannot be located.
- The main housing contains a solid loop for chain or wire rope connection, to provide support and strain relief for electrical cabling.
- Standard thread ring allows interconnection of weatherproof plugs, to assist in retention in the socket during operation.
- Double pole switching for the socket with large terminals 5.5mm A and N terminals with 4mm Earth
- Integral power available LED
- Features internal cord clamp for mechanical cord restraint
- Diameter of cable gland entry Ø10.5mm to Ø7.5mm for heavy duty cable.
- Available in resistant white for better performance in kitchens and deli applications to cope with the cleaners and blend in with white décor that is often used
- Red slide switch and button to symbolise suitability for acidic cleaner resistance applications like others in the Buffalo range
- Spring loaded flap to maintain the IP rating when plugs not installed
- Ideal for use with the BUP310 and BUP315 series Buffalo plugs.

Cleaning Guide:

Spraying cleaning products on to electrical products is not recommended.

It is important to ensure that switches are turned off before cleaning.

Do not use any cleaning sprays - only wipe down with damp cloth or rub with dry cloth. (Do not use an abrasive cloth as it may scratch the plastic).

Do not use harsh chemical cleaners as these can break down the plastic and cause it to crack.
