METAL CLAD

**TRADER
RHINO**  TM

The Trader Rhino Metal Clad range of industrial switchgear offers a robust electrical solution for harsh industrial environments.

Designed to meet strict Australian standards for reliability and safety, it is made from high quality die-cast aluminium, provides excellent impact resistance and durability in extreme temperatures (-25 to +60°C). Bright visible blue and yellow colouring with the switch status clearly marked, Rhino includes features such as Isolation lock-off for large padlocks.

Quick changeover

Designed to be compatible with existing footprint and infrastructure to allow easy maintenance changeover.

Easy installation

Installation is easy with external mounting options; these products are ideal for external or interior applications where harsh environments exist. The back boxes and covers contain quality earthing terminations to allow high quality connection to the gasket seals for safety.

Long lasting performance

Covers are secured with stainless steel screws for optimum corrosion resistance when working in conjunction with aluminium. This thoughtful design streamlines installation and ensures long lasting performance.

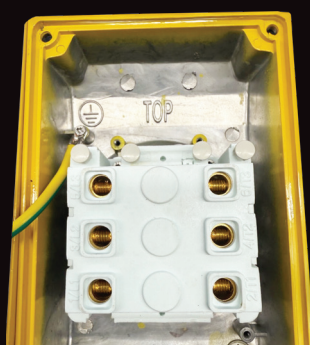

*Anaconda fittings are a brand of Anamet Electrical Inc.

Switch Disconnectors

RHSWL220	Switch Disconnecter Weatherproof IP66 20A 500V ac 2 Pole Large Aluminium Yellow
RHSWL232	Switch Disconnecter Weatherproof IP66 32A 500V ac 2 Pole Large Aluminium Yellow
RHSWL240	Switch Disconnecter Weatherproof IP66 40A 500V ac 2 Pole Large Aluminium Yellow
RHSWL263	Switch Disconnecter Weatherproof IP66 63A 500V ac 2 Pole Large Aluminium Yellow
RHSWL320	Switch Disconnecter Weatherproof IP66 20A 500V ac 3 Pole Large Aluminium Yellow
