

Why choose Powermesh?

So many smart products on the market share the same features. Here are the unique benefits of choosing Powermesh.

A complete Smart Home solution.

The Powermesh family includes switches, dimmers, power points, fan, blind and garage door controllers to connect everything in the home.

Australian owned & designed

A complete solution that's specifically suited for our local market with certification to Australian standards.

Easy for any Electrician to install

Easy to retrofit with no additional wiring, the switches & dimmers also work with 2 wire (no neutral) installations.

No Wi-Fi router required for setup

Easily pair devices without needing Wi-Fi or any additional equipment.

Energy Monitoring

Real time power usage of all devices in both watts per hour and operating cost in dollars and cents.

Works with Smart Assistants

Link your Zimi account with the Google Assistant and Amazon Alexa for voice control of everything in your home.

Handover is quick and easy

Home owners can simply scan the Zimi Card to instantly take ownership without the need to meet onsite.

Scalability, Security, Reliability

Zimi core services are hosted on the Google Cloud, one of the best IoT Platforms available in the world.

Extended Wireless Connectivity

Every Powermesh device is a repeater, creating reliability connectivity with extended wireless signal strength.

No Pucks avoid call backs

Devices don't hang in the wall or the ceiling for better safety and reliability. End users can also setup and configure themselves.

No subscription costs

Zimi is a free app for Android or iPhone and there is no hidden subscription fees or charges.

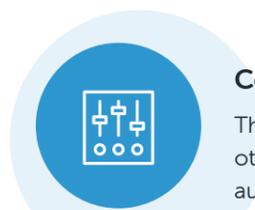

We support our customers

Home owners can get full software support from Zimi which alleviates the Electrician from having to answer all the questions.

No training needed

If you can install a Power Point you can install Powermesh. No training or certification is needed, it's that simple.

Complete system integration

The Zimi API allows control with other control systems from home automation to complete Building Management Systems.

The affordable solution

Cheaper overseas DIY gadgets and expensive specialist systems are creating demand for a reliable and scalable smart home solution.
