## IP66 DIN 4 Pole Enclosures

Buffalo DIN Rail Accessory Mounting Enclosures provide a facility to mount up to 4 poles of equipment such as MCB's and RCDs - external to a switchboard in an environment needing a high level of protection.

As with all Buffalo products, they are manufactured from robust, UV and good chemical resistant material to provide long reliable life in the dust and wet.

The BU4DINLED features a 250V~ LED inbuilt into the cover, which has long cables with crimped ends to allow it to be wired for power available into the module - or outgoing power available - depending on the application.

Cable length is suitable for wiring below the DIN rail and can reach easily into the lower section of switch gear installed into the enclosure.

BU4DINLEDLE comes with a BU4DINKIT in the box.

Cat No.	Description	Poles	Enclosure Included	Conduit Entries
BU4DIN	Enclosure DIN 4 Pole	4	BUBB2G	2 x 25mm 1 x 32mm
BU4DINLED	Enclosure DIN 4 Pole with LED	4	BUBB2G	2 x 25mm 1 x 32mm
