Care and Cleaning

Always ensure the appliance has cooled completely before cleaning and maintenance.

- Always switch off the appliance and unplug it from the electrical socket and wait for it to cool down before cleaning. Ensure that the unit is cool enough to work on.
- Avoid contact with heat surface/parts.
- Never spray with liquids or submerge the appliance in water or any other liquid.
- Do not use harsh chemicals or solvents to clean this product and avoid using abrasive cleaning agents. Use a slightly dampened, lint-free cloth to clean this appliance.

Warning: NEVER immerses the unit, power cord and plug in water or any liquid while cleaning and never allow water to drip into the appliance.
